

## Stress Brings Out the Difference in Male, Female Brains

On September 30, 2010, in [People/Culture](#), by admin

By **Stephanie Pappas, LiveScience Senior Writer**

Think your anger is as plain as the scowl on your face? If you're talking to a stressed-out man, that may not be the case.

A new study finds that when men under stress looked at angry faces, they seemed to disengage, at least according to brain scans showing

lower

# Personality Set for Life by 1st Grade, Study Suggests

On August 9, 2010, in *Getting the Best form Yourself, People/Culture, Strategy/Competition*, by admin

Our personalities stay pretty much the same throughout our lives, from our early childhood years to after we're over the hill, according to a new study.

The results show personality traits observed in children as young as first graders are a strong predictor of adult behavior.
